

## *COVID-19 Patient Triage Screening Criteria*

- **Patient Age:** must be *between 10 – 70*.
- **Patient must have at least one of the COVID-19 Symptoms:** *Shortness of Breath, Cough, Fever*
- **Patient Pulse Ox:** must be *greater than 92%*.
- **Patient Pulse:** must be *110 or less*.
- **Patient must have ED ESI Levels:** *3, 4, or 5*.

If the patient meets the above COVID screening criteria **and there are no open beds in the surge area**, take the patient's name, cell phone number, time of arrival and record it in the Pt. Overflow Tracker (#6 Red Binder). Instruct the patient to wait in their car until the waiting room is available at which time you will call them, and document the time in #6 (Red Binder).
